Honorable Susan Richard Nelson  
United States District Court  
316 N. Robert Street  
St. Paul, MN 55101

In Re: *National Hockey League Players' Concussion Injury Litigation*  
Court File No. 14-2551 (SRN/JSM)

Dear Judge Nelson,

The Court's April 26, 2017 Memorandum and Order in the above-referenced case (Doc. no. 731) "requests that the CTE Center advise the Court of the status of this production [of digitized slides of NHL players' brains] by filing a short letter update each month, beginning one month from the date of this Order." (p. 29).

My clients inform me that they are compiling a complete inventory of all slides and photographs. Some of these materials are located in the CTE Center at Boston University, and others are in the Brain Bank (located in the VA Hospital in Bedford, MA). They expect to complete this task in the next few weeks. The research assistant charged with responsibility for this aspect of the Center's work is resigning next month before he heads to medical school, but he assures me that his successor will pick up where he leaves off, and that he is cognizant of the University's obligation to this Court.

Please let me know if you would like any additional information.

Respectfully submitted,

Lawrence S. Elswit
